EDUCATION

Maharaja Surajmal Institute of Technology, Delhi
Bachelor of Technology in Computer Science and Engineering

Aug 2023 – July 2027
CGPA: 8.82/10

Dewan Public School, Meerut
Class XII
Class X

July 2022
Percentage: 91.2%
Percentage: 92.6%

EXPERIENCE

CG Infinity
Software Development Engineer (SDE) Intern

June 2026 – Present
Noida, India

- Developed full-stack solutions using **Next.js** and **.NET**, working across frontend interfaces, backend APIs, and enterprise application workflows.
- Built and integrated enterprise functionality using **Salesforce Lightning Web Components (LWC)** and **Apex**, gaining hands-on experience with Salesforce application development.
- Worked with **AWS S3, AWS Lambda, and AWS Glue** for cloud-based storage, serverless processing, and data integration workflows.
- Gained practical experience with **API integration, cloud services, backend development, and enterprise application architecture** across multiple technology stacks.

PROJECTS

NexChat – Real-Time Messaging Platform

Live | GitHub

- Engineered a full-stack real-time messaging platform using MongoDB, Express.js, React.js, Node.js, and Socket.IO, supporting one-to-one messaging, typing indicators, online/offline presence, and database-backed read receipts.
- Re-architected WebSocket event broadcasting from direct socket IDs to Socket.IO rooms, improving read-receipt reliability across multiple tabs and socket reconnections.
- Optimized real-time interactions using debounced global user search and typing-indicator events to reduce redundant API calls and socket traffic.
- Containerized the backend using Docker and deployed the application on Render with a separate static frontend deployment.

YouTube RAG – AI Video Search Platform

Live | GitHub

- Architected a three-service RAG platform consisting of a React frontend, Node.js orchestration layer, and FastAPI Python microservice for semantic search and conversational interaction with YouTube content.
- Separated authentication/session management from the retrieval and generation pipeline, establishing clear service responsibilities across the application.
- Integrated LangChain, Pinecone, NVIDIA NIM, vector embeddings, and semantic retrieval to generate context-aware responses from YouTube transcripts.
- Implemented non-blocking ingestion with frontend polling to handle vector-database readiness and deployment cold-start constraints without paid infrastructure.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, C++, Python, C#, SQL
Frontend:	React.js, Next.js, HTML, CSS, Tailwind CSS, Redux Toolkit
Backend:	Node.js, Express.js, FastAPI, .NET, REST APIs, JWT Authentication, Socket.IO
Cloud & Data:	AWS S3, AWS Lambda, AWS Glue, PostgreSQL, MongoDB, Pinecone, Prisma
Salesforce:	Lightning Web Components (LWC), Apex
AI / Generative AI:	LangChain, LangGraph, RAG, Vector Embeddings, Semantic Search, NVIDIA NIM
Tools:	Git, GitHub, Docker, Postman, Vercel, Render, MongoDB Atlas
Core Concepts:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST APIs, System Design

ACHIEVEMENTS

- Secured **8.82/10 CGPA** in B.Tech Computer Science and Engineering at MSIT Delhi.
- Built and independently deployed a production-grade three-service RAG platform integrating Node.js, FastAPI, LangChain, NVIDIA NIM, and Pinecone.
- Designed and deployed a real-time messaging platform with Socket.IO, Docker, database-backed read receipts, and room-based WebSocket broadcasting.
